The Facts...

Did you know?

3,600,000,000 people in the world are missing teeth.

Half of the world's population is missing one or several teeth. There are many different reasons for this: such as an accident, illness or insufficient care.

*conclusion based on several dental reports

When was the last time you bit into a crunchy apple? Do you avoid speaking or smiling because of your smile? Do you have a prosthesis that causes you trouble and discomfort instead of the much needed support?

Missing, decayed, infected and loose teeth can have a negative impact on your quality of life.

Dentures aren't the only answer

Often dentures are used as the only alternative for missing teeth. However, many denture wearers often complain about problems and discomfort caused by their prosthesis. However, modern dental solutions can now provide an alternative to dentures, helping to bring back full function of your teeth and quality of life.

Real Patients. Real Stories.
Dentistry and Photography by Dental Boutique.

Why We Do What We Do

Because we believe that everyone deserves the freedom of expression, to be able to smile freely, and to be confident in themselves.

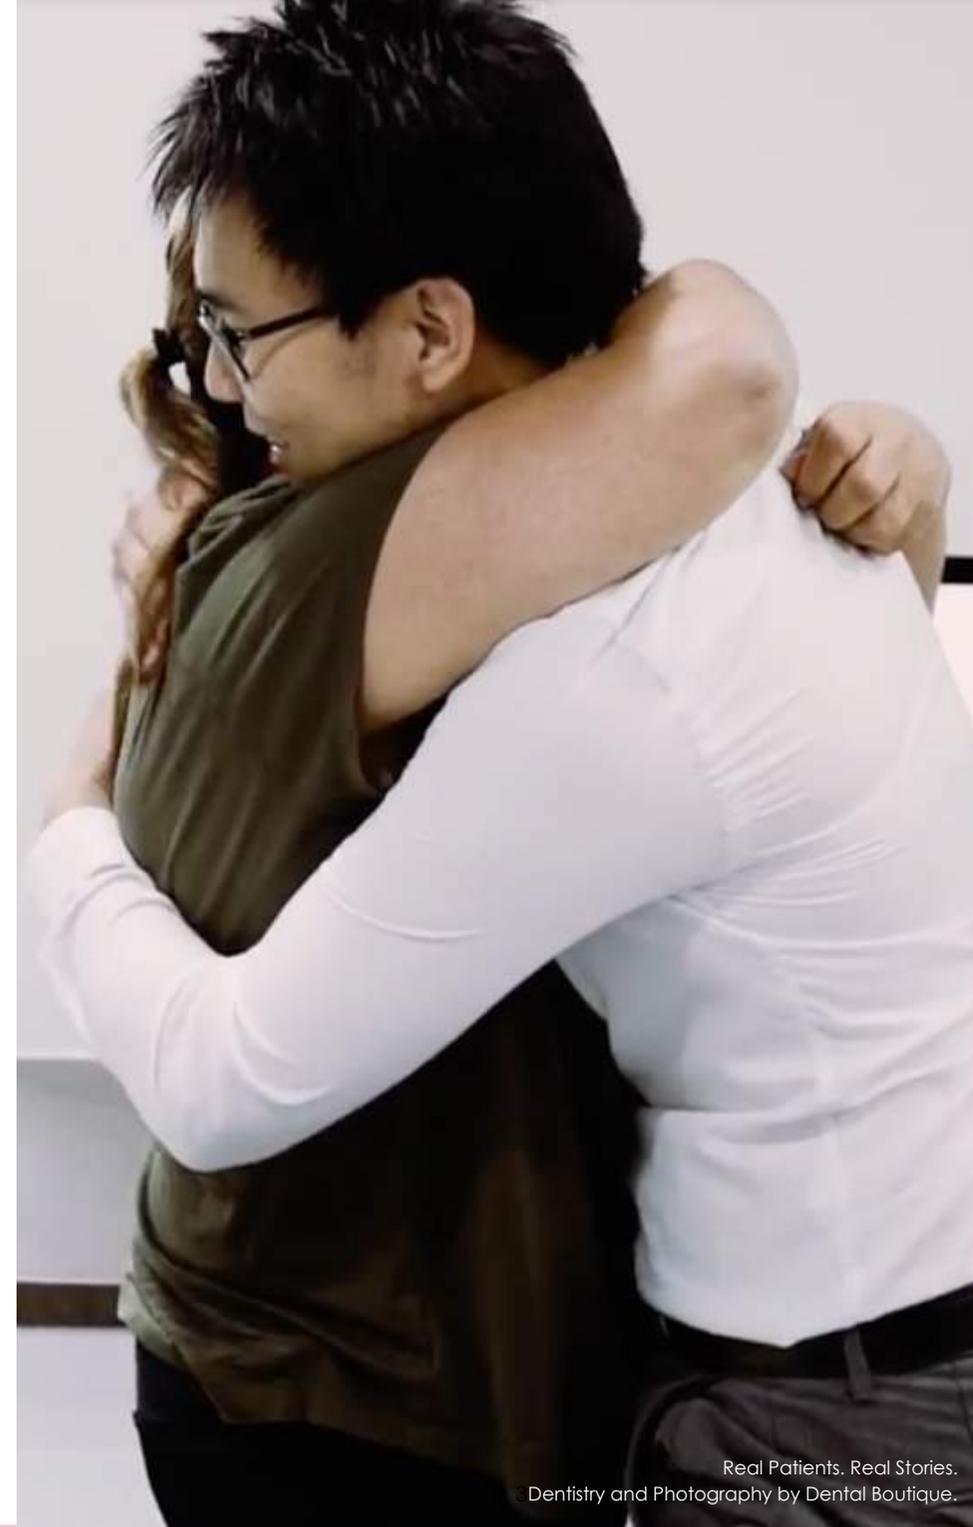

We challenge the mediocrity in the dental industry. We inspire and empower people to overcome their fears to achieving the dental health and smile they deserve. We focus on pain free solutions and changing one smile at a time.

At Dental Boutique, we don't see your smile as it is, but what it could be. We believe that your smile is the key to happiness. It allows you to express who you really are, giving you the confidence and comfort you deserve.

We Have Good News

Dental Boutique is one of the few dental practices in Australia with the ability and expertise to perform this advanced treatment.

All-On-4® technology is a revolutionary and cost effective technique that allows full replacement of teeth and gums, and is a fixed and permanent alternative to full teeth dentures, supported by four implants completed within just 1-3 days. As a permanent solution, All-On-4® dental implants are more functional and secure than regular removable dentures, that looks, feels and functions like natural teeth.

Real Patients. Real Stories.
Dentistry and Photography by Dental Boutique.

WHAT IS

All-On-4?

All-On-4® Technology is one of today's most revolutionary and cost-effective dental techniques. The treatment brings a realistic full replacement of teeth and gums for people with failing teeth.

The term All-On-4® refers to “all” teeth being supported on just “four” implants. With All-On-4® technology, you can expect a restored and fully functioning set of teeth. With that comes restored facial height for a fuller face, correct bite and jaw position, improved speech and an overall restoration of the best you! All-On-4® involves the placement of a full set of fixed teeth on only four dental implants. It's truly a procedure that can not only change your smile, but your life.

Traditionally, dentures were the only solution for total teeth replacement. Fortunately with the new All-On-4® technology, you will see your smile function restored and aesthetics enhanced with minimal time in the dentist chair. All-On-4® also decreases the need for bone grafts, making it easier to place the implants. This procedure is perfect for people who have lost a great deal of teeth, have gum disease, have experienced bone loss already or would like a more permanent solution to wearing dentures.

WHAT ARE MY Options?...

	 DENTURE	 OVER DENTURE	 TRADITIONAL IMPLANT BRIDGE	 ALL ON 4
Suitable Candidates	Patients with no teeth who are looking for a cost effective, short-term solution.	Patients who want a more secure lower denture.	Patients who want a fixed long-term solution.	The gold standard teeth replacement solution. Patients who want a fixed, immediate, cost-effective and long-term solution with major bone loss.
Removability	Removable	Removable	Fixed	Fixed
Comfort	Mostly uncomfortable and may affect speech, ability to chew some foods, and taste.	Slightly better than dentures, due to better stability of lower denture.	Very comfortable, feels like natural teeth. You can eat and chew like normal.	Very comfortable, feels like natural teeth. You can eat and chew like normal.
Oral Hygiene	Remove to clean and when sleeping.	Remove to clean and when sleeping.	Very easy to clean, brush and floss with water floss to replace flossing.	Very easy to clean, brush and floss with water floss to replace flossing.
Implants (per jaw)	0 implants	2-4 implants	6-10 implants	4 implants
Treatment Time	2-4 weeks	2-4 months	3 months minimum	3 days

HOW DOES IT *Work?*

DAY 1

FOUNDATION OF BONE AND GUMS

You will have the option of completing your treatment under local or general anaesthetic. Here, we will remove all teeth and clean out any remnants of disease. We will prepare and level the jaw bone and gums, so they are stable to accept your All-On-4 implants. We will take moulds and measurements of your mouth, in preparation for your trial smile the next day.

DAY 2

WAX TRIAL SMILE

On this day you can get a vision of what your new smile will look like using a wax material. Here you can make changes to the size, shape and colour. At this appointment all the necessary adjustments are implemented as required, and before you leave you get an idea of what your final teeth are going to look like.

DAY 3

FINAL INSERT

The day has arrived! It's time to insert your bridge/teeth! We've finally done it! You now have a fully functioning smile. In this appointment we refine the shape, size of your teeth and check your bite, to ensure you are 100% satisfied with the results.

DAY 4

REVIEW

If upgrading to titanium implants, we will do this 3-6 months after your initial insert. Here we will review your current All-On-4 implants by taking X-Rays and making any necessary adjustments if necessary, to ensure you are satisfied with your final result. To maintain optimal hygiene health, we recommend booking in a clean with us every 3-6 months to ensure you know how to care for your teeth, implants and gums.

WHO CAN BENEFIT FROM

All-On-4?

- ✓ Patients who are missing most or all teeth (generally from widespread infection, disease and decay), or have natural teeth that are failing, All-On-4® is a great teeth replacement solution for you.
- ✓ Those with advanced gum disease and loose teeth. Gum problems and loose teeth will eventually end with tooth loss. So it's best to be proactive with finding the best teeth replacement option for you, including All on 4.
- ✓ Those who are suffering from ill-fitting dentures or don't want to wear removable dentures. Many patients give up on wearing dentures due to their lack of discomfort and stability. Now with modern technology, we can replace your dentures with All-On-4® - a fixed and permanent replacement option that looks, feels and functions just like natural teeth.

Real Patients. Real Stories.
Dentistry and Photography by Dental Boutique.

Questions ANSWERED

1 Am I a suitable candidate for All-On-4®?

You may be a suitable candidate if you have natural teeth that are failing from decay and infection, have advanced gum disease and loose teeth, have multiple missing teeth loss, are suffering from ill-fitting dentures and do not want to wear removable dentures. A bone volume evaluation must be done prior to the procedure to ensure sufficient bone for implant placement.

2 What other option do I have besides All-On-4®?

If your teeth are salvageable, we would recommend to maintain your teeth. In cases where your teeth are not able to be saved, other options besides All-On-4® would be a denture and an implant retained denture. Both these options are removable.

3 Can I be asleep during the treatment?

The procedure itself will not be painful as we manage all your treatment under Local or General Anaesthesia. Under Local Anaesthesia, you may feel some pressure and pushing, however it should not be painful at all. Our dental surgeons and assistants are very experienced and gentle, and we check in with you regularly to ensure your procedure is as pain-free and comfortable as possible. If you choose to complete the All-On-4® treatment under General Anaesthesia, we have an experienced in house anaesthetic team that will be present throughout your entire procedure to ensure safety and comfort. General Anaesthesia is the only way to be 100% certain that the procedure will be pain and pressure free. Most All-On-4® cases are completed under General Anaesthetic where you are completely asleep. Whatever your special needs or requests are, be sure to raise them at your consultation and we will plan your treatment accordingly.

4 How long will my treatment take?

Your treatment will take between 2-3 days to complete. The 1st day would be surgery day (under GA or LA). The next day would be the try in of your new smile and any adjustments to your smile will be made on this 2nd day. On the 3rd and final day, your final set of teeth will be completed. This timeline can vary from person to person depending on the severity of infection.

Questions ANSWERED

5 Is there any downtime or recovery time required?

We generally recommend that you take up to 5-7 days for recovery. Swelling (and sometimes bruising) generally peaks on the 3rd day starts to subside on the 4th day onwards. The healing time varies from patient to patient depending on their overall health and severity of infection.

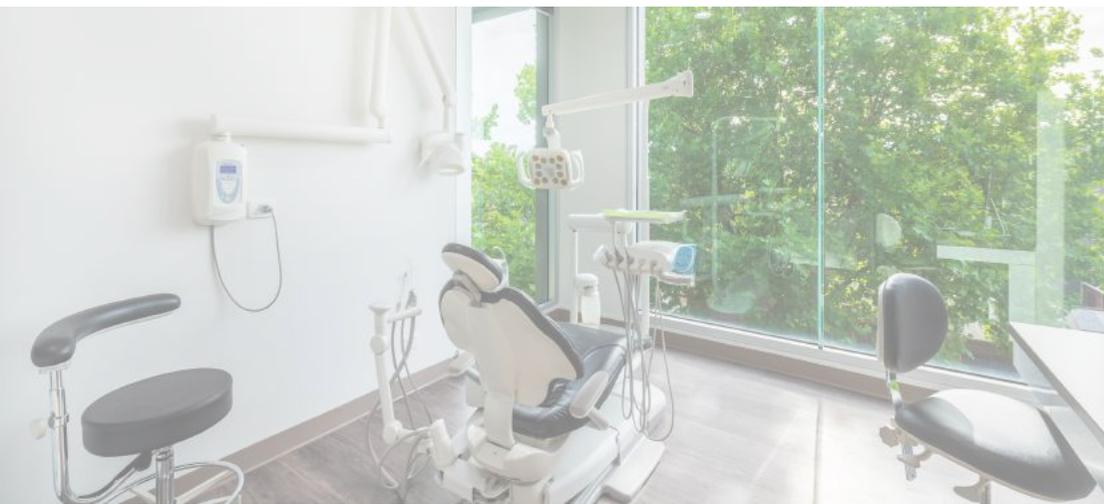

6 How much does All-On-4® cost?

The price of All-On-4® depends on your pre-existing condition, suitability, number of teeth remaining, your bone condition, and the material of choice for your All-On-4® prosthesis. A personalised treatment plan and accurate quote can be given upon a consultation with our All-On-4® dentist, once we assess your pre-existing condition, discuss your smile goals and provide you with all the options for your treatment and material choices in your specific situation. While many of our patients are attracted by the option of payment plans, they are often also pleasantly surprised to find that treatment will cost less than expected. There is also an option for early release of superannuation fund if you are an eligible candidate.

7 Do you offer payment plans OR early release of superannuation fund?

Yes we do. At Dental Boutique, we have our own dedicated financial team who will assess your financial situation and help organise the best way forward for you. If you weren't aware, you are able access your superannuation early to pay for dental implants in most cases. Our team will be able to guide you through the application process. We understand that cost is important, and encourage our patients to do their own market research – however, always compare apples for apples! Consider the training and qualifications of your dentist and their team, and the dental artisans they use. Beware cheaper alternatives using different implant brands and type to material being used to construct your teeth and bridge. For more information, give us a call at 1800 NO PAIN, and one of our patient consultants will be able to provide more information in relation to payment plans and early release of superannuation fund.

State-Of-The-Art
CLINIC

THE DENTAL BOUTIQUE *Difference*

Nobel Biocare Affiliation

We are affiliated with the only implant system with a track record and are certified to perform the All-On-4® procedure in Melbourne. We invest in genuine parts and quality materials in all our All-On-4® procedure to ensure the success of your case.

One Team, One Location

At Dental Boutique, all your work will be completed in our facility, without the need to travel to different places or hospitals. Your All-On-4® dental implants procedure can be completed under General Anaesthesia as we collaborate with our in-house Specialist Anaesthetist.

Virtually Pain Free

Luckily our boutique offers a number of sedation, relaxation and general well-being techniques, including sleep dentistry, gas inhalation, needle-less technology, premedication and safe-guard signals that have helped many of our patients overcome dental anxiety and fear. Every patient at our practice has the opportunity to embark on a calm journey to achieve their desired smile.

Personalised Treatment Plan and Results

We believe in educating you on your first initial visit and helping you explore all available treatment options in modern dentistry. Each patient is carefully assessed to determine if All-On-4® is the most suitable treatment option for you based on your teeth conditions, concerns and desires. Every patient will receive a personalised treatment plan, including pricing.

Experience & Care

With more than 20 years of clinical dentistry experience, we will ensure your All-On-4® experience is professional, caring and reassuring at the highest level to achieve the best possible result for you. Our caring team is not only passionate about changing smiles but lives. We are with you holding your hand throughout your entire journey.

High Success Rates & Rapid Results

Each year we complete many All-On-4® cases with very high success rates. Research and our experienced team shows that, if carried out correctly, your All-On-4® should function and look like natural teeth. At Dental Boutique, you will receive your teeth in as little as one to three days from your surgery day. We have streamlined our All-On-4® processes and that means that you spend absolutely minimal time without teeth.

VIRTUALLY *Pain - Free* DENTISTRY SERVICES

FOR ALL YOUR PAIN AND ANXIETY FREE DENTAL SOLUTIONS

The majority of patients who visit Dental Boutique do so without pain or worry, however for some patients, visiting the dentist can be scary for a number of reasons, often preventing them from visiting the dentist for years. This means that problems worsen and patients are unable to achieve their dream smile.

People often fail to realise that their teeth and gums are connected with other parts of the body, and issues in the mouth can have a negative long term impact on their general health and wellbeing.

One bad experience at a dentist due to pain, being reprimanded or judged or not being listened to can be causes of anxiety. People can also get anxious as they feel that they lose control lying in the chair.

Luckily our boutique offers a number of sedation, relaxation and general well-being techniques, including sleep dentistry that have helped many of our patients overcome dental anxiety and fear. Every patient at our practice has the opportunity to embark on a calm journey to achieve their desired smile.

As part of the Dental Boutique Way, we offer a holistic approach to improving smiles, which means we encompass not just changing your smile, but the physical health and emotional well-being of every patient in our care. This helps support extraordinary smile outcomes for our patients.

Our team of highly trained and qualified dentists who have a special interest in treating anxious patients have transformed many formerly anxious patients to feeling at ease when visiting us. To help others overcome dental anxiety, Dental Boutique offers a full range of facilities and equipments specially designed for the most anxious patients...

HOW DOES DENTAL BOUTIQUE TREAT PATIENTS WITH

Dental Fear?...

At Dental Boutique, our passion is to empower people to overcome their dental fear in order for them to achieve the dental health and smile they deserve. The comfort of our patients is our priority. With all patients we carry out five practice non-negotiables, as a standard of care:

GENERAL ANAESTHESIA OR IV SEDATION

Using IV Sedation or General Anaesthesia (GA) under the care of a registered specialist anaesthetist, patients can receive dental treatment while they are “asleep.” It is ideal for people who have severe dental anxiety or phobia, fear of needles, have a low pain threshold, have a history of traumatic dental experiences, a strong gag reflex or those who have complex dental requirements. General Anaesthesia is the only way to experience a completely pain free dental treatment.

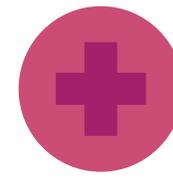

GAS INHALATION

Gas inhalation allows patients to experience a relaxed sensation as rapidly as after 6-8 breaths, effect only lasts while the patient is breathing the gas. This technique allows patients to still be in control and enables them to respond to our dentists as they are still conscious.

COMPUTERISED ASSISTED LOCAL ANAESTHESIA

Advancement in technology has allowed us to provide patients with the ideal and alternative situation for anyone who does not like needles. Our computerised assisted system for local anaesthesia replaces the traditional technique. Patients who experience our technology will find it offers less pain and more contained numbness for the area that is being treated,

PREMEDICATION

If required, our dentist can prescribe you with premedication which can be taken an hour before your dental procedure. This produces a mild level of sleepiness and amnesia for relieving anxiety before a dental appointment.

RELAXATION TECHNIQUES AND SAFE-GUARD SIGNAL

Relaxation techniques we employ include controlled breathing, listening to music, and other distraction techniques which helps to relax your body and shifts your focus to other things in order to preoccupy your mind. In addition, we establish a fail-safe signal with our patients that helps them maintain control during treatment and alerts us if they are feeling pain or discomfort.

EMMES *Story...*

Emmes visited Dental Boutique all the way from Auckland. After losing both her parents and sister, she suffers from depression and heartache. She always loved to laugh loudly and unapologetically. But when the difficulties of life weighed down on her, her teeth started deteriorating and she started losing that love for laughter. Emmes has been through a lot in life- losing both of her parents, sister and struggling with her self-confidence.

Emmes had visited a lot of Dental clinics, however, felt that she was being judged for her situation. She wanted to find a dentist who would help her with her smile without judgement, rather than condemn her for it. Emmes anxiety made it extremely difficult to even visit us at Dental Boutique, but finally she found the courage to get her smile restored. We transformed her smile using our All-On-4 treatment, which she is truly happy with. Now, Emmes has new reasons to laugh and smile.

Emmes

Upper All-On-4

DAVID'S *Story...*

David had a massive fear of the dentists to the extent where he would have panic attacks when driving past a dental clinic. Over 20 years passed without visiting the dentist, and David decided to look into All-On-4 total teeth replacement. After careful planning and discussion with our team, David travelled over 6 hours to Melbourne to have his new dental implants inserted at Dental Boutique within 3 days.

His teeth are now amazing, strong and healthy as they possibly could be! At Dental Boutique, it is our mission to empower people with dental anxiety to overcome their fears. David is no longer afraid of going to the dentist. The most beautiful gift we can give to others is a new smile that changes their life.

David
49 years old
Upper All-On-4

BETI'S *Story...*

Beti is a home body. And it's not because she just loves the indoors; it's because she tries to hide her teeth. Beti would avoid dropping her daughter Olivia at school and eventually it escalated to the stage where she would not even leave the house.

Most of Beti's teeth were lost due to lack of care. This caused her to lose confidence in her smile and in herself. Beti came to Dental Boutique seeking a restored smile and a reason to believe in herself again. We completed both upper and lower All-On-4. Her reaction to them was just so beautiful.

For the first time in a long time Beti is leaving the house. She now picks up her daughter Olivia from school and has the ability to see all that the world has to offer beyond her home. We are so proud of how far Beti has come emotionally!

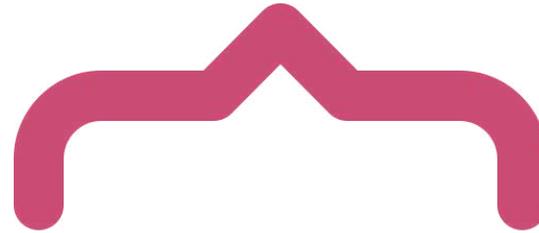

Elizabetha

- ✓ High success rates

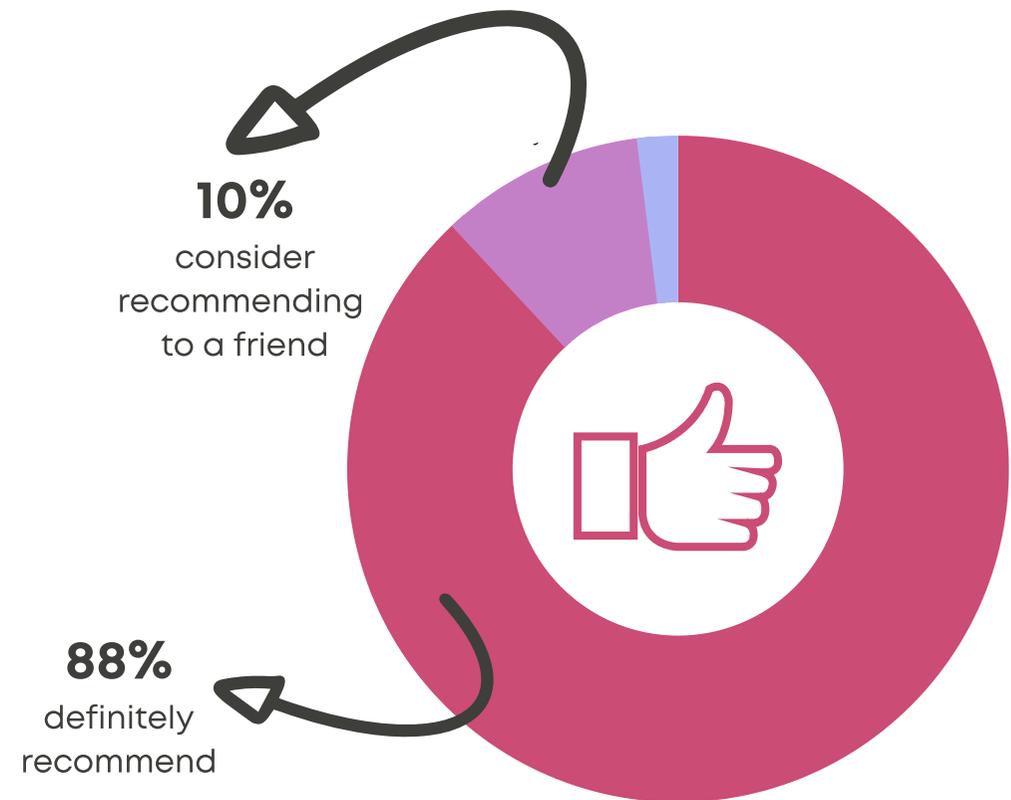

THE *Statistics*

All-On-4® treatment is a proven procedure, which has been used to treat hundreds of thousands of patients around the world. The high patient satisfaction speaks for itself.

98.8% is the cumulative **prosthetic survival rate** at 10 years.

98% of patients world-wide **would recommend** this treatment.

Babbush CA. Post treatment quantification of patient experiences with full-arch implant treatment using a modification of the OHIP-14 questionnaire.
Malo P, de Araujo Nobre M, Lopes A, et al. The All-on-4 treatment concept for the rehabilitation of the completely edentulous mandible: A longitudinal study with 10 to 18 years of follow-up.

SO WHAT DO SOME OF

Our Patients Think?...

The team at Dental Boutique focus on the overall patient experience, placing a high emphasis on both the comfort and result for each patient, working until you are completely satisfied with your smile. With hundreds of 5-Star reviews we are a trusted provider for All-On-4® treatment.

"Oh my goodness where do I start. These guys are absolutely amazing. The level of care and understanding is way above what I ever expected. I am so very happy and you can bet I will be singing your praises to everyone."

- Karen

"From someone who was embarrassed about her smile to someone who can't stop smiling, this experience was life changing for me. If anyone is thinking of taking this journey, do it. Because you're worth it."

- Suzie

"My fear has completely vanished! If you are hesitant or anxiety is getting in the way, I can reassure you that you will be so looked after; not to mention the professionalism and the quality of my new teeth and smile are next level."

- Leonie

"The best part is that my family and friends tell me that I look 15 years younger and I can eat nuts!!! I can now enjoy the foods that I couldn't eat before with my previous teeth, and it's a bonus that my new teeth look amazing as well!"

- Imy

FIRST STEPS TO A

New Smile...

At Dental Boutique, we make it simple to achieve your dream smile in 5 simple steps. Typically treatment can be completed between one and two weeks from your first consultation with us.

STEP 1 INITIAL CONSULTATION

Virtual consult or visit the practice to discuss all teeth replacement options, including All-On-4® and pricing to see which treatment option is most suitable for you!

STEP 2 DIGITAL SMILE DESIGN

Involves recording information using photos, videos, moulds of teeth, 3D imaging of teeth and bone, planning the blueprint of the smile and discussion with the technician to ensure the best possible result functionally and aesthetically for you.

STEP 3 TREATMENT DAY

We remove diseased tissue and place your implants under local or general anaesthetic.

STEP 4 REVIEW CONSULTATION

Final teeth are tested to check the smile and bite for optimum function and aesthetics. Final adjustments (if any) are completed overnight.

STEP 5 FINAL FITTING

Insertion of the final All-On-4® fixed bridge with no or minor adjustments.

PAYMENT Options

At Dental Boutique, we offer the following payment options:

- We accept cash, eftpos, and credit cards (MasterCard, Visa, AMEX).
- We offer HICAPS that allows you to instantly claim on the spot from your private health insurance.
- We offer payment plans for general, cosmetic and specialised dental treatment.
- Early Super Release.

PAYMENT PLAN OPTIONS

While many of our new patients are attracted by the option of payment plans, they may often be pleasantly surprised to find that the treatment will cost less than expected.

However, if finance is a barrier to achieving your optimal dental treatment, Dental Boutique offers payment plans, often allowing you to start treatment straight away.
